Newtech Infosoft Pvt. Ltd

SOFTWARE, WEB & SEO SOLUTION

About Us

The new millennium i.e. the information age will reach great heights with the help of IT industry. And the world will be at one's fingertips; literally. To be the growing part of the millennium, a group (now Newtech Infosoft Pvt Ltd), formed in 2001, had set up certain standards to achieve excellence. The main aim of Newtech Infosoft Pvt Ltd is to provide IT enabled services.

Expertise

All of our team members have several years of expertise developing customized, fully integrated systems in a variety of industrial standards. Some of our team members have worked on software projects for industry leading firms.

Technically Advanced

Our software development tools and products implement Object-Oriented design and programming. Further, we use the most modern development tools and technologies available on the market today.

Availability

The Internet allows us to communicate with your team as easily as if we were in the next room. All of our project managers you will potentially interact with have strong English language skills thus eliminating language barriers.

Software Development

We at Newtech Infosoft Pvt. Ltd understand that success comes from thorough analysis and specification, a well-established development process, knowledge of the latest technologies, expert management, effective communication, and full-cycle quality assurance.

Custom software development is a complicated process. A lot of people think that good technical expertise in software development is sufficient for a project's success. However, this is not necessarily so. We at Newtech Infosoft Pvt. Ltd understand that success comes from thorough analysis and specification, a well-established development process, knowledge of the latest technologies, expert management, effective communication, and full-cycle quality assurance. Here are the main points of our software development policy.

Web Based Software Development

> C#
> Asp.Net MVC
> Angular Js
> Node Js
> Web Api
> Php
> Java server/Client side software

Android Apps Development

> Android App UX / UI Design
> Native & Hybrid App Development
